

“IFS has ...
literally
changed my
future and my
life by getting
me on track.
My latest credit
score was
close to 700.”

-- Charles, IFS
Customer

Many low-wage workers live paycheck-to-paycheck and lack savings for a rainy day.

When these consumers do have money put aside, the savings often become depleted to address a single immediate problem such as a broken furnace or an auto repair. A lack of financial knowledge and practice push these already financially strapped workers deeper in debt.

Isles Financial Solutions helps customers tackle their financial problems by providing intensive one-on-one coaching, financial education and access to innovative financial products. Isles designed this package of products and services to

improve customers' credit scores and overall financial health.

Isles delivers IFS through employers of lower wage workers. The goal is to help build positive financial habits that support the long-term financial health of not only the employee, but the employer as well.

Isles Financial Solutions provided financial capability services to 249 lower wage workers in 2015. Through improved financial skills, customers have generated savings, increased credit scores, reduced debt. Through reduced financial stress the goal is for workers to become more productive and stable.
